Objective

To enter the dynamic world of web development and utilize the skills I've acquired to help build up a brand. I prefer to work on front-end code but I also have an understanding back-end development.

Skills & abilities

I am proficient in both front-end and back-end web development languages. If any are missing from the list below, I am confident I will be able to understand any new languages I will need to learn quickly with the foundation I was able to build around coding logic.

Front-End

- JavaScript
- HTML
- CSS
- React
- Bootstrap

Back-End

- REST
- Apollo GraphQL
- PostgreSQL
- Express.js
- Node.js

Projects

ARTCO

Front-End Web Development | May 2024

- Responsible for development of user-facing interface and web pages utilizing React-Bootstrap and CSS for custom styling.
- Working with a team to connect both the front-end and back-end to present a clean MVP.

NATIONAL PARK WEATHER SERVICE

Back-End JavaScript | March 2024

- Responsible for development of back-end JavaScript to fetch data from an API and populate a list of national parks and a 5-day forecast for each park using only JavaScript, HTML, and CSS
- Working with a team to connect both the front-end and back-end to present a clean MVP.
